

**Recently we received the following information from the Alabama State Department of Education:**

**Information on Summer P-EBT Cards:**

ALSDE IT submitted about 451,000 students' names to Alabama DHR on July 5, 2022. This file included students who were eligible (free, free DC snap, DC snap extended and reduced) as of the close of SY2021-2022. Those also included graduates who actually graduated at the end of the school year (no early year graduates).

Students who became eligible as of the August 31, 2022 deadline will be pulled on September 30, 2022 and submitted to Alabama DHR at that time or the following week. This file will include students who are eligible (free, free DC snap, DC snap extended, DC Medicaid, DC Medicaid extended, reduced and DC reduced Medicaid). Alabama will process that file as soon as it goes through and pass their test environment. It could take a full month for this to fully process. Therefore, it could be late October or sometime in November before they will receive the benefits.

**How will the benefits load on the CARDS or CARD being issued?**

If benefits were received for the Summer of SY2020-2021, then the benefits will load to that card.

If a card was never received, then a new card will be issued.

If a new card is issued, then it would be mailed to address that is in the ALSDE Student Management System (AIMS)...receipt of card will be dependent on local mailing timeframe.

If any information has changed since the issuance of the last card, it will generate a new card.

If a replacement cards needed, please call the P-EBT hotline.
