The Program Goals of Agriscience Education at WCHS is to:

1. Provide education in and about agriculture from the perspective of science and technology
2. Prepare students for employment in an agriculture career
3. Prepare students for entry into postsecondary programs in Agriscience fields
4. Provide education about the role of Agriscience in the conservation of the Earth’s natural resources
5. Develop life and employability skills essential for successful employment
6. To develop skills needed to fulfill occupational skills, social, and civic responsibilities

Courses Offered at Addison High School

Agricultural Communications  420073
Agriscience  420009
Introduction to Agriscience  420004
Agriscience Exploration  420007
Applied Agricultural Mechanics  420104

MR. GRAHAM’S AG DEPARTMENT

Learning to do
Doing to learn
Earning to live
Living to serve

Addison High School
FFA Department
Agriculture is the largest employment sector in America and the basis for everyday life. There are many different job opportunities in today’s market. Ranging from welding, building construction, landscaping, forestry, floriculture, plumbing, electrical, aquaculture, cattle farming, gardening, and the green industry. It is the goal of Addison Ag Department to give each student as many tools as possible to gain the much needed employability skills that are required for entrance level positions.

Future Farmers of America is an integral part of the program of Agriscience Education at AHS. Every student is encouraged to join each year, and there is a place for everyone. Students will be able to practice their skills learned in class by competing in many Career Development events such as Floriculture, Nursery Landscape, Forestry, Soil Science, Ag Mechanics, Small engines, and Livestock. In addition, FFA officers will be selected to represent our chapter across the state and nation, developing skills helping confidence and employability.

**FFA Mission**

FFA makes a positive difference in the lives of students by developing their potential for premier leadership, personal growth and career success through agricultural education.
